

Government of Kerala

Vital Statistics Bulletin 2005

**Department of Economics & Statistics
Thiruvananthapuram
August 2007**

PREFACE

The Bulletin presents the Vital Statistics of Kerala for the Calendar year 2004. The data relating to vital events received from the registering authorities are presented and vital rates estimated.

This report is prepared on the basis of data collected under the revamped system implemented in the State as a part of all India pattern. This is the fifth report based on this system.

The bulletin is prepared by Smt. S Leelamony, Deputy Director with the help of Smt. K.Shailamma, Assistant Director in the Vital Statistics Division of the Directorate under the guidance of Sri.D.Rajan, Additional Chief Registrar of Births & Deaths and Additional Director. Processing of the data was carried out in the Computer Division of the Directorate.

I would like to place on record the co-operation and valuable services rendered by Local Registrars, District Registrars ,Deputy Directors and staff in the District Statistics Offices to make this venture a success.

I hope that this report is of great help to Planners & Administrators and those engaged in the field of Health and Demography.

Suggestions for the improvement of the publication are always welcome.

Thiruvananthapuram,
21.08.2007

M.R. BALAKRISHNAN
DIRECTOR

CONTENTS

<i>Table</i>		<i>Page</i>
1	Total number of Live births, Deaths, Stillbirths, Infant deaths, Maternal deaths and their rates.	9-10
2	Census Population of Districts (Rural, Urban, Sex-wise).	11
3	Total Number of Live births, Deaths and Infant deaths in Corporations and Municipalities having a population of 30,000 & above.	12-13
4	Total number of Births, Deaths, Infant deaths in Corporations and Municipalities having population of 30,000 & above District wise	14
5	Total number of vital events and its rates in Corporations and Municipalities.	15-16
6	Live birth by type of attention at delivery – Rural & Urban.	17
7	Live birth according to order of birth and Literacy of mother for the state - Rural	18
8	Live birth according to order of birth and Literacy of mother (Urban).	18
9	Live birth according to order of birth and Literacy of mother for the state Kerala.	19
10	Live birth according to order of birth and Literacy of father (Rural).	20
11	Live birth according to order of birth and Literacy of father (Urban).	20
12	Live birth according to order of birth and Literacy of father – Kerala state.	21
13	Live birth according to Order of birth and Occupation of father – Kerala (Rural).	21
14	Live birth according to Order of birth and Occupation of father – Kerala (Urban).	22
15	Live birth according to Order of birth and Occupation of father – Kerala state.	23
16	Live birth by Order of birth and Age of mother – Kerala (Rural).	23
17	Live birth by Order of birth and Age of mother – Kerala (Urban).	24
18	Live birth by Order of birth and Age of mother – Kerala	24
19	Live birth by Age of mother in Municipalities and Corporations – Kerala.	25-26
20	Birth by religion in the Corporations and Municipalities of Kerala.	27-28
21	Live birth by religion in Kerala – District wise.	29
22	Month wise distribution of Live birth in Kerala – Rural/ Urban.	30
23	Sex Ratio of the Live births in Kerala (District wise)	31
24	Month wise distribution of Deaths in Kerala.	32
25	Deaths by Age and Sex in Kerala.	32
26	Death by religion in Kerala (District wise).	33
27	Distribution of death due to some specified diseases.	34-35
28	Infant death by sex in Kerala (District wise).	36
29	Infant death by Age and Sex in Kerala	37
30	Maternal deaths by age	37
31	Time gap in registration of birth and death – kerala	38

VITAL STATISTICS BULLETIN – 2005

Introduction

Civil Registration System is a continuous, permanent and compulsory recording of the occurrence and characteristics of vital events. It deals with the Vital Statistics of human beings is having almost a direct impact in the developmental planning of the country. The data generated from Civil Registration System plays a vital role in decentralized planning and hence these data at the lowest level of administrative area is well recognised. It is one of the primary source of population data. The main objective of Civil Registration System is to record the annual change of population at National and State level. The data obtained from Civil Registration System is one of the major tools used by demographers and planners for analyzing the composition of population.

The registration of births and deaths is a statutory activity performed under the legal provisions of Registration of Birth and Death (RBD) Act 1969 came into force in Kerala on 1st April 1970. The act provides suitable machinery for the effective registration of births and deaths. This provides safety to social status and individual benefits. The birth/death certificate provides multiple uses for the individual such as evidence of age, domicile, inheritance etc., Director of Panchayaths is the Chief Registrar of Birth and Deaths in Kerala and is the Chief executive authority for implementing the provisions of the Registration of Birth and Death Act. Chief Registrar will be assisted by a Deputy Chief Registrar. The Additional Director of Economics and Statistics is designated as the Additional Chief Registrar of Births and Deaths. A Deputy Chief Registrar, Deputy Director of Economics and Statistics, assists him. Actual work of the legislation is being done by the local registrars of births and deaths appointed under this act. At the District level, the District Panchayaths Officer, secretaries of municipalities and corporations are empowered as the District Registrar of Births and Deaths.

The Secretaries of Grama Panchayaths, health inspectors and health officers of Municipalities and Corporations and the executive officer of Kannur Cantonment are the local Registrar of the concerned registration units.

Conceptual and Empirical Frame Work

As per the R B D Act, births and deaths are to be registered within 21 days after the occurrence of the events at the place of occurrence. The details such as date of event, date of registration, sex and the details of father and mother such as their age, religion, literacy, occupation, order of birth etc of each event are recorded in the registers at the time of registration. These details are carried over to the prescribed birth, death and still birth cards and are forwarded to the Deputy Directors of the Districts Offices of Economics and Statistics Department. Soft copy of the same is forwarded to Directorate for further processing.

Limitations of the data

Registration of vital events is not complete due to under registration. Lack of awareness about the need and importance of registration of births and deaths and lack of registration procedure knowledge among the public may be the reasons for the low levels of registration

particularly of infant deaths. This may adversely affect the quality of the statistical data. Efforts are being taken to create mass awareness about the importance and necessity of registration. While on analyzing the data it is seen that the vital events in urban areas are higher than that in rural areas. This is due to the fact that registration of births and deaths are carried out at the place of occurrence of the events, irrespective of the place of usual residence of mother.

Crude Birth rate- Crude Birth Rate is defined as the number of births in a given year per thousand mid year population in that year

Crude Death rate- Crude Death rate is the number of deaths in a given year per thousand mid year population in that year

Infant Mortality rate- Infant Mortality rate is the number of infant deaths(age below one year)in a given year per thousand live births in that year.

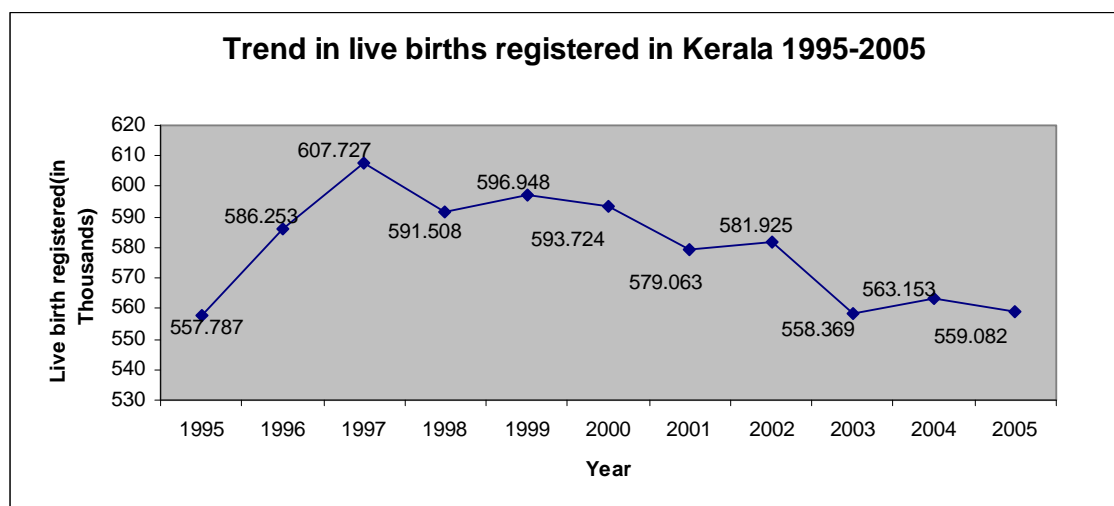

Maternal Mortality rate –Maternal Mortality rate is defined as the number of maternal deaths per thousand live births and still births of that year.

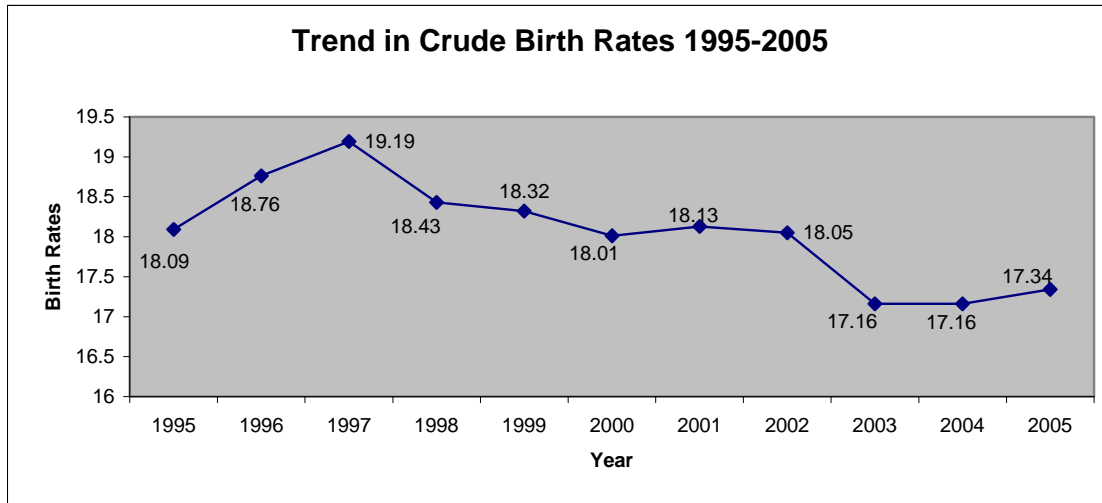

Still birth rate—Still birth rate is the number of still births in a given year per thousand live births and still births of that year.

Birth registered and crude Birth rate

During the year under report 5.59 lakhs of live births were registered .Out of which 2.18 lakhs were reported from rural areas and 3.41 lakhs from urban areas. Of the total live births 51% were male , 48% were females and for the remaining 1% sex were not reported. The number of registered live births decreased from 5.63 lakhs in 2004 to 5.59 lakhs in 2005.

Trend in no of live births registered in the state for the last 10 years is shown below.

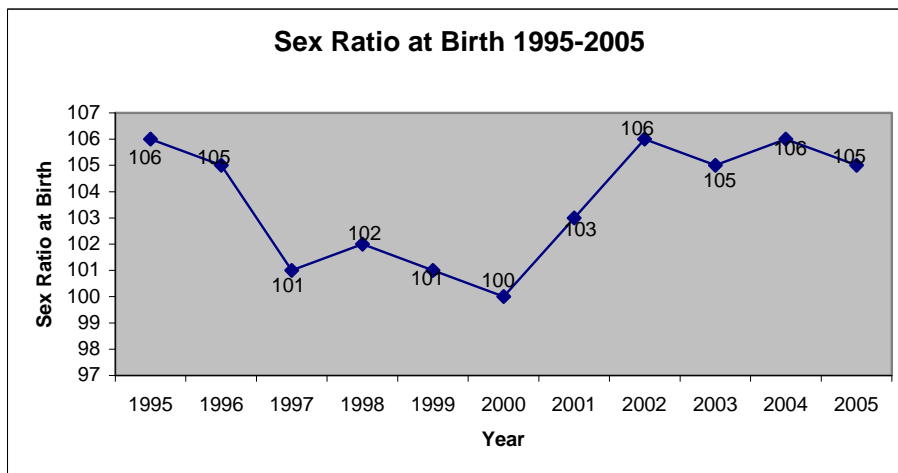

The birth rate of the state during 2005 is 17.34. The district-wise data reveals that the highest birth rate 22.54 was recorded in Malapuram District, followed by Kozhikode 20.24. The lowest rate of 12.36 is recorded in Alappuzha District. Birth rates recorded in Thiruvananthapuram, Kollam, Pathanamthitta, Alappuzha, Kottayam, Idukky, Ernakulam and Palakkad districts are below the state average.

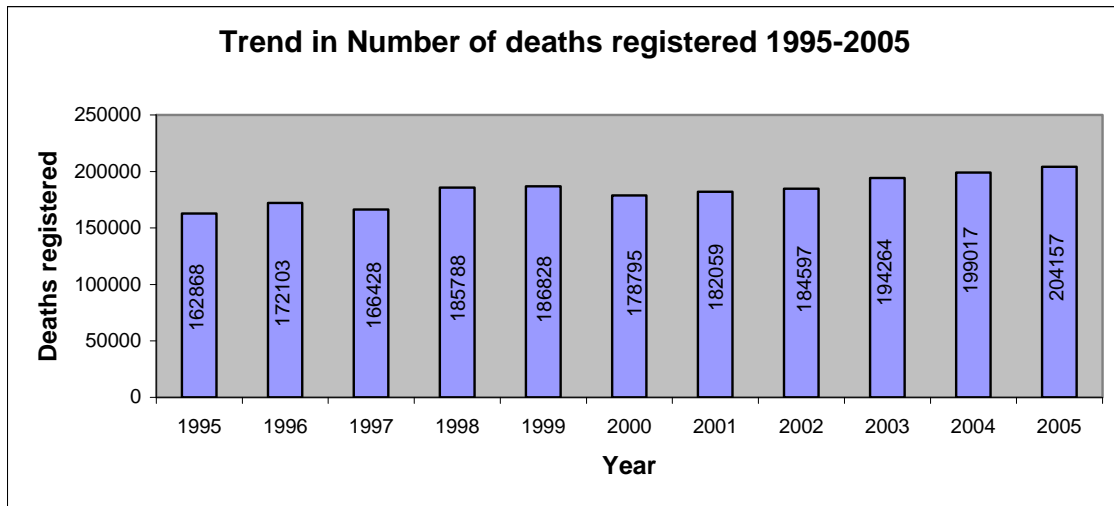

Sex Ratio at Birth

The sex ratio at birth is defined as the number of male births per 100 female births. Sex ratio at birth is a biological entity and varies only in a narrow range from one population to another population. Universally it is observed that this varies between 104 to 106 due to biological reasons. During the year under report the Sex Ratio at Birth is calculated as 105. The following gives the trend in SRB for the last 10 years in respect of Kerala.

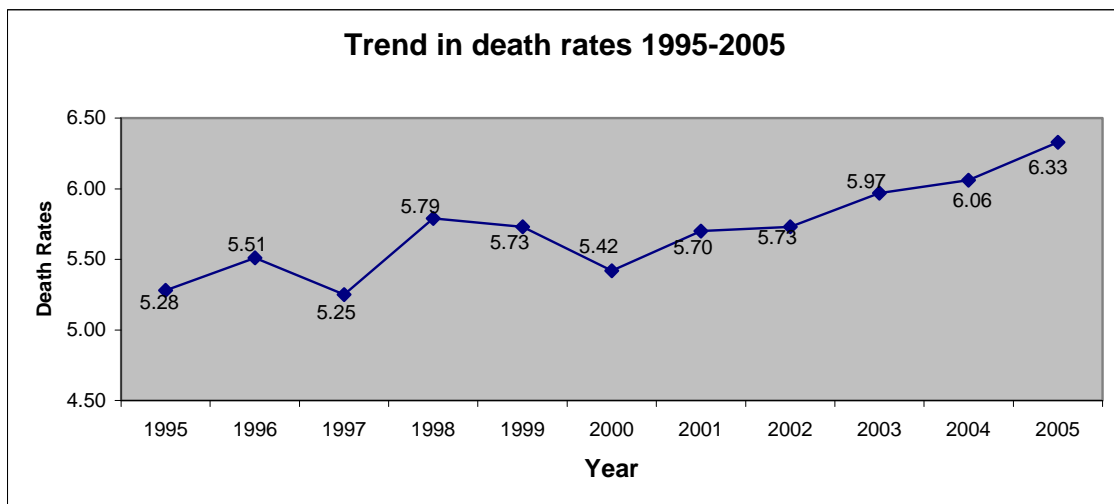

Death registered and Crude Death rate

2.04 lakhs of deaths are registered during the year 2005. The Deaths reported is increased from 1.99 lakhs in 2004 to 2.04 lakhs in 2005.

The crude death rate of the state was calculated as 6.33 during 2005 as against 6.06 in the previous year

On an analysis of the district-wise figures shows that Thrissur District stands first with a death rate of 7.88 followed by Pathanamthitta 7.82, Kottayam 7.36 and Ernakulam 7.00. The lowest is in Malappuram 4.47. Death rates recorded in Thiruvananthapuram, Pathanamthitta, Alappuzha, Kottayam, Ernakulam, Thrissur and Kozhikode were above the state level.

Infant Mortality Rate

Infant mortality rate calculated on the basis of the registered births and infant deaths. During the year under report it is 7.35. The highest IMR 34.35 is reported in Kozhikode, followed by Thiruvananthapuram 11.84. Districts with IMR more than the state level are Thiruvananthapuram and Kozhikode. The lowest rate is recorded in Kasaragode Districts 0.84.

Maternal Death Rate

During the reporting year, 360 maternal deaths were reported, of which 192 were from rural areas and 168 from urban areas and the rate calculated is 0.64. No maternal deaths were reported from the urban areas of Pathanamthitta .

Still birth

During the year 2005, 3529 Still births were registered in which 951 were from rural and 2578 from urban areas. The still birth rate of the state for the year under report is 6.27 as against 4.68 of the previous year. District-wise break up reveals that the highest rate 9.75 Kozhikkode District followed by Alappuzha and the lowest 3.2 is reported from Kollam District.

Conclusion

During the year under report Malappuram District has the highest birth rate as well as the lowest death rate. On an analysis, it is seen that the estimated vital rates, such as Birth rate, Death rate, Infant death rate, Still birth rate & Maternal mortality rate show a marginal marginal increase when compared to those of the previous year, 2004. As in previous years, the vital rates estimated for urban areas are higher than that of rural areas .The tendency of utilising the modern medical facilities available in the urban areas by the rural residents at the time of occurrence of events may be the reason for the urban bias.

Table—1 A
Vital rates at a Glance

Year	Birth Rate	Death Rate	Infant death rate	Still Birth rate	Maternal Death rate
